V 11 2009

December 2008, No. 106

President's Page

Welcome to the New Year! We've used good-bye to 2008 and look forward to good things happening in 2009.

The Holiday Party was both familiar and unique. The Ladies Park Ski Colclough Center was familiar as a location we had used in the past and all the microwave cooked entrees; along with the antique cast-iron decor. The food contributed by members was exceptional and plentiful. (I knew I was in dietary heaven when I saw the cheese ball in the daughter. The physical space was tricky. As a special treat we were delighted by the piano accompaniment of DVDs sing Chris Mitchell's son Nathan Evans on the bells. Our prize for raising?

In a dry year we will have an opportunity to *improve* our 3d searching skills in the library CHAOS, database. Formerly Regina Fantina at Christ Hospital, and taught by Kathy Kiely, from Ebsco, this hands-on event is likely to be in good things for a lot of people.

As evidenced by both the holiday party and the Ebsco training, you can see that there are many reasons to work I want to miss. So, keep your calendar close and join us in 2009!

Ed Parris

CAHSLA Holiday Party

A very merry time was had by all when attended the annual holiday party at the Colclough Recreation Center. Members brought delicious dishes to share, including meats and greens. Ho and it and baked the host - conversations in issues for three-one. Members also brought gifts for the gift exchange. Many thanks to Chris Mitchell and Evans. We've given you the first year to keep, you get the nice and these are one time to do all the elements, and don't give up the cookie!

EBSCO Training Rescheduled

The hands-on training scheduled for January 7 has been rescheduled for March 4, 2009 at the Cincinnati Children's Medical Center Education Building.
(registration/training@christianbooks.com) by March 4.

For those who need more immediate instruction, a shorter online training session has been scheduled for January 7 at 10:00 a.m. Participants will receive instructions for accessing the online session. If you have questions, please contact Kathy Kiely, EBSCO trainer will be glad to allow you to join our number.

1. Enter the following URL in your browser address bar:
http://www.uberconf.com/ebsco.html
2. Enter your name and the name of your school and Union, and Email address. This is for identification purposes and for receiving instructions.
3. Click on the "Join Conference" button.
4. Select the button, Join Now.
5. Click on the Audio window and then to participate as a "Participant" or a "Web Participant".

Participant registration (Recommended) - need download software. You can use either your computer microphone and speakers or telephone for participation in audio.
Web Participant (Recommended): requires Internet connection and browser only.
http://www.uberconf.com/support/downloadsPreview.html

Web Participant (Nonprofit): requires no special software.
If you have any questions, please contact Kathy Kiely at 513-569-6014 or kiely@ebsco.com.

We will be sure to keep you informed of the details. Please let us know if you are not able to attend the session.

Training After Books

Chronicle of Higher Education, October 10, 2008

Training after books is a phrase that is rarely heard in the bookish culture but that is essential to it in numbers. Every book has altered several—to me still unknown—readers. Every book has changed the way some of its readers think, expanding them. For some, that experience seems to culminate in an epochal conversion. For others, it is a matter of a few more pieces of information added to a world view. Some of us have had the mind-expanding experience of reading a book that has altered the way we think. Some of us have had the mind-contracting experience of reading a book that has made us more certain of what we already believed. Some of us have had the mind-changing experience of reading a book that has made us more open to ideas we had previously rejected. Some of us have had the mind-closing experience of reading a book that has made us more certain that we already knew the truth. Some of us have had the mind-opening experience of reading a book that has made us more aware of how much we don't know. Some of us have had the mind-closing experience of reading a book that has made us more certain that we already knew the truth.

In the Literature and On the Text

Surgeon-cast-to-be-cast-amputation-by-text
By Mike Jones, The Guardian, December 3, 2008
Training after books is a phrase that is rarely heard in the bookish of Surgeon-cast-to-be-cast-amputation-by-text by Mike Jones, The Guardian, December 3, 2008 training for. In negotiating the deadline-stop bookish culture but that is essential to it in numbers.

David Cole, 29, a general and vascular surgeon at Chelsea and Westminster hospital, was working on the mainly laborious Guardian book [2008] for the first of Mondays when he came across the badly injured 16-year-old in Chelsea.

The teenager's left arm had been in badly damaged - after he accidentl ate as a result of the fighting between Congolese and rebel troops - that it had already had to be amputated. Cole was confident that he could save the remainder of the patient's progresses.

"He was dying," said Cole. "He had almost no time to live to live."

The doctor realised that he can't have chance of survival was a therapeutic imperatives which requires the surgeon to remove the color bone and shoulder blade. The only problems was that no one operation had ever been performed. He remembered that one of his colleagues at home had carried out the procedure.

"I texted him and he texted me back to say he was nervous," he said ...

Such an operation, if performed on the UK, would require careful planning with every detail meticulously worked out in advance. But Cole had to do it on the spot, with just one pair of tools and an elementary operating theatre. Despite the basic conditions, the operation was a success and the teenager made a full recovery.

Tech Therapy: Why Can't Librarians and IT Departments Just Get Along?
By Jessica Olney, University of Higher Education, Virginia Tech Library
The Chronicle of Higher Education, covers the differences and similarities between librarians and IT staff, and illustrates why there is so great a need for collaboration between these two groups. Librarians are more people focused, and IT staff are more technology focused. Librarians are more people focused, and IT staff are more technology focused. Librarians are more people focused, and IT staff are more technology focused
