'Tis the season! Time for holiday cheer

and to acknowledge the amazing accomplishments of our CAHSLA colleagues. Thank you to everyone who helped with the Program Committee. The committee's heartiest kudos to Sharon Gentry, Jennifer Pettigrew, Sara Nichols, Jennifer Hallick, Barb Bauserman, and Jennifer Hall for a job well done.

CAHSLA took on Local Library & Research Grants for Rural Ecumenical Outreach (LLAGERO) and Rural Ecumenical Outreach Grants (REOG) this year. Thank you to Sharon Gentry, Jennifer Pettigrew, and my colleagues, Sara Nichols, Cincinnati Office Manager at the Local Library & Research Grants for Rural Ecumenical Outreach (LLAGERO) and Medical Institute, and the famed mixer, Elbitchkey, by John LitLover. Elbit Elbitchkey was a beloved member of the Cincinnati community. She was the Archivist of the Freedom Yearbook, we missed the events of which we were unable to attend. Elbit's memory will be honored by the CAHSLA Scholarship, better attended by our SLA and ERCRA colleagues. Thanks to Cary Gilmore for his work on the Elbit Elbitchkey Scholarship Awards for Healing!

Still Learning Computing

The first three meetings of our GIS Learning Community got us off to a great start. For each meeting, we had two 15-minute learning sessions and one 30-minute hands-on session. Topics included: Using GIS software and data, exploring specific locations in the planet earth, and creating maps. Participants also had the opportunity to work on archaeological project. Next year we will have four hands-on sessions per meeting. Please let me know if you are interested in joining the GIS Learning Community. Contact me at: dave.hill@uc.edu

Fearful, Scientist Engage on "Harmful Archiving"
Jennifer Blanchard, archivist for The Christ Hospital Health Network, "Slammed that decades of cocktail shindy measurements could be lost to the ages if the agency's archives are not preserved." Blanchard is a favorite referral to many such requests and she explained that the archives are not a priority for the agency's mission.

The efforts include a "guerrilla archiving" event in Toronto, where experts and many interested parties were invited to help download as much data as possible in the coming weeks, and a collaboration of scientists and librarians in Washington who are compiling an online list to replace scientific information.
