President's Page

Greetings CAHSLA Colleagues and Friends,

Our association year is swiftly moving along! We have had the tips and tricks workshop, the Spring Dinner Meeting, and the Spring Day Event at Shaw's Tricks for a traffic check. In the Spring, I have worked 150 different kinds of weather inside of an hour.

Our Vice President/President Elect, Jennifer Bridges Crossmiller, who has been instrumental to pull together current excellent events during the first quarter of the year.

Our Past CAHSLA Tech Event was held on February 9, 2018 at the Christ Hospital. Topics included user experience, web scraping and literature in-depth presentation by UC Libraries Digital Archivist Ben Turner on the Cincinnati Art Museum's Art Institute to Study Medicine and the Rise in Attending Physicians.

Coming soon is the Munch and Learn (10 Dems' Books – An alternative Fact Check) on March 21, 2018 at the Health Sciences Library at UC. Our Spring Dinner Meeting is on April 18, 2018 at Embassy Suites Cincinnati Rivercenter. Our Spring Day Event is on May 16, 2018 at Kings Island.

It is at this point in the association year that we are planning for the next meeting for offices for the upcoming 2018-2019 association year. Any interested members may contact me, Jen Bridges Crossmiller, Nominations Committee Vice Chair Sarah Bee or Library Committee Chair Amy Gratz to express interest in serving.

Please continue to work hard, smart and safe (not pushing) online for future events. Reach out to those who took part in the events and ask them to share their experiences and our constructive assistance who make them possible.

Alex Hawkins, President

SECRETARY'S REPORT

CAHSLA Meeting Minutes
Tuesday, February 6, 2018
1:30 PM, Shawkins

CAHSLA Executive Committee Present: Alex Hawkins, President; Jen Bridges Crossmiller, Vice President/President Elect; Trudi Kang, Treasurer; Amy Gratz, Library Committee Chair; Sarah Bee, Nominations Committee Chair; Jennifer Bridges Crossmiller, Secretary

The 2018 CAHSLA Tech Event was held at The Christ Hospital from 8 AM to 12 PM. Presentations were given by Ben Turner, Digital Archivist for UC Libraries, and Jennifer Bridges Crossmiller, Liaison Librarian and Data Visualization Specialist for UC Libraries. Ben presented on his work digitizing the Cincinnati Art Museum's Art Institute to Study Medicine and the Rise in Attending Physicians Records Collection. Jennifer presented on Cincinnati's Homeless Count: Public Library 2010-2017 Comparisons. Both presentations were followed by a Q&A session. Ben and Jennifer were also available to answer questions one-on-one during the breakfast and lunch breaks. Ben and Jennifer were commended for their work and presentations.

In addition to the tech presentations, we ate cake from Dibella's and discussed the remaining 2018 CAHSLA events. Munch and Learn will be held on March 21 at the Health Sciences Library at UC. Spring Dinner Meeting will be held on April 18 at Embassy Suites Cincinnati Rivercenter. There is a UC Health presentation slated. It was fun to catch up with each other in person.

Trudi Kang will email Board & Alumni Email to be held at the Spring Dinner Meeting.

Thanks to our event organizers: Amy Koshollek, our presenters, Trudi Kang and Arlene Peele, and host coordinator, Regina Hartman!

2017 Southeastern Consortia Symposium: Focus on Outreach, Spain

Amy Koshollek and Lisa Nieman at the 2017 Southeastern Consortia Symposium

In February, I attended the 2017 Southeastern Consortia Symposium in Barcelona, Spain, and presented our research on using text mining to identify research trends in the literature of nursing. This work is a result of the Research Methods Group of the Network of Midwestern Health Sciences Libraries (NOMHSL). Lisa Nieman (UC) and myself, Amy Koshollek (UC), were the two librarians who presented. Lisa and I are both members of the library research group and presented on one of the three research papers presented at the conference. We are hopeful to publish our study in the near future.

As the study we investigated the effects of library instruction on the type and quality of literature used in our respective institutional repositories (IR). Specifically, we looked at the number of downloads of articles that were mediated by librarians versus articles that were deposited by authors without librarian intervention. Our study was conducted at two institutions in contrast: UMaryland and Rutgers State University-New Jersey. Both institutions have IRs that are supported by librarians who provide and library creation staff in describing data records in accordance with Dublin Core standards. Our study was conducted at UMaryland's IR, Digital Data (Processes and Tools) 2013. We found that the datasets in the repository that were mediated by librarians were 2.5 times more likely to be viewed. Our study at Rutgers is ongoing and we hope to present our findings at the 2018 Symposium in Portugal. We also plan to present our findings at the 2018 Medical Library Association Annual Meeting in Atlanta, Georgia, and we will submit a manuscript for publication in the Journal of the Medical Library Association (JMLA), with one of our team contributing to the Journal's Methods Column.

Overall, I thought all of the people who we met were interested in the benefits of digital data. The conference is organized by the Digital Curation Centre (DCC) and is a great opportunity to network with researchers, IR managers, and librarians from around the world. The DCC is also a great resource for information on digital curation and preservation as well as guidance about how to increase inclusion and equity for underrepresented groups in STEM.

CAHSLA Colleagues

Billie A. Brownlee, 1952-2018

It is with deep sadness that we share the passing of Billie A. Brownlee, formerly the Assistant Director for Public Services at Cincinnati's Walters-Lunken Law Library. Billie was a graduate of Northern Kentucky University's Chase College of Law and a member of the Kentucky Bar Association. Billie worked for many years at UC Health's Science Library and was instrumental in developing the medical history collection. She was also a member of the Medical Library Group of Southwestern Ohio and Northern Kentucky (MLG) and the Greater Cincinnati Medical Librarians' Consortium (GCMLC). She served as the MLG Treasurer for many years, including overseeing of a number of successful fundraising efforts to support the Medical Library Group Scholarship Fund and the Memorial Endowment Fund. Dr. Pat Vehorn Slattery, Emeritus Professor of Nursing, UC, remembers Billie as the Walters-Lunken Librarian who always "went above and beyond." Pat, 2018 MLG President, is a member of the GCMLC.

Billie was a natural born storyteller and teacher. She was wise, smart, and funny. She was a wonderful mentor to many of us. She was also a devoted wife and mother to her daughter Jessica and son Jeffrey. Billie was a member of both Kennedy and Ashtanga-style yoga studios. She was a lover of books, cats, and dogs. She was a member of Mt. Auburn Presbyterian Church, where a memorial service was held on Saturday, February 10th.

News You Can Use

FOAM Free Search Engine

Education

I came across a concept that is new to me and I thought it was pretty handsome. It is FOAM – Free Open Access Medical Education. I found an interesting article about it here: https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3876549/pdf/1472-6920-13-203.pdf and a website here: http://emergencymedicinecases.com/about-foam-emergency-medicine-cases/. Here's a quote from the article:

"FOAM is a conceptual framework, not a platform. It is a philosophy that encourages open sharing of knowledge, free from restrictive boundaries. Open and collaborative learning is a core principle of FOAM."

For the entire #FOAM movement I heard a cute line from Internal Medicine video podcaster Dr. Matthew Watto (@mattwatto) at https://www.instagram.com/p/BcJ7Ow4lJ6B/ about the #hh_general category, or podcast, I'd be interested. Like Bill Cosby’s Chicken Soup, Chicken Soup.

Announcing FAIA Network Open – A New Journal from The JAMA Network

JAMA Network Open will be a general medical journal that includes publication of original research articles across the full spectrum of medicine.
